

**STATEMENT OF RISK WARNING**

(In accordance with C210 Spanish clients only)

Trading Foreign Exchange (Forex) and Contracts for Difference ('CFDs') are complex financial products that are traded on margin. FX and CFDs carry a high level of risk since **leverage** can work both to your advantage and disadvantage. As a result, CFDs may not be suitable for all investors because you may lose a part or all of your invested capital. Before deciding to trade, you need to ensure that you understand the risks involved taking into account your investment objectives and level of experience. You should not risk more than you are prepared to lose.

During the account opening process the default leverage is set at 1:10. You reserve the right to request a higher leverage but this will be at the discretion of the Company and subject to the Client's appropriateness assessment.

By increasing the leverage you need to consider the following: a small margin deposit can lead to large losses as well as gains. It also means that a relatively small movement can lead to a proportionately much larger movement in the size of any loss or profit which can work against you as well as for you.

If you wish to request a higher leverage than the default (1:10) please confirm with your own words below that you have read and fully understood the risk involved in trading with margined products.

Please scan the signed document (alternatively take a picture with your phone) and send it to [backoffice@leverate.com](mailto:backoffice@leverate.com).

Confirmation by the client (Please acknowledge of the understanding of risk involved in trading with margined products):
